

INVOLUTE

Appropriate Technology since 1971

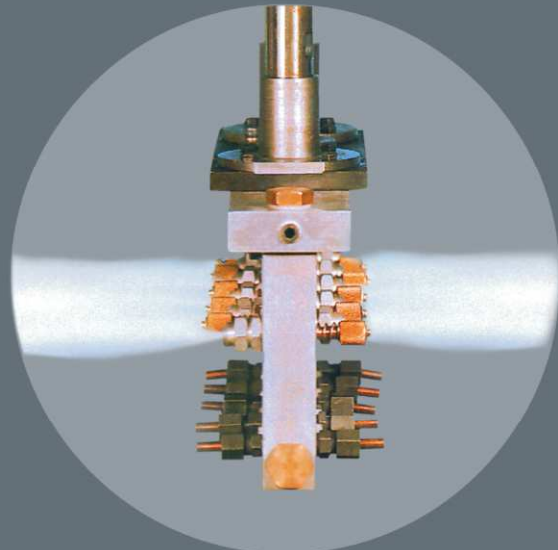

★ Machine Mounted Autosprayer

- This Autosprayer uses uniquely designed spraynozzles and spray manifold.
- Very finely atomised liquid spray can be obtained specially when the liquid pressure and spray air pressure are held at optimum levels.
- The nozzles and the manifold are designed without any moving rubber parts for minimum and easy maintainance.
- Autosprayer has the following cycle :
 - Reach the Sprayzone in rapid.
 - Blow air for a preset time.
 - Spray liquid for a preset time.
 - Blow air for a preset time.
 - Retract in rapid.
- Timers can be set from the control panel.
- Manifold can be swung away to facilitate die change or from the path of core cylinders during die closure every cycle.
- Prime Movers are Electric and Control is by PLC.

Specifications

Vertical travel	1200 mm
Manual horizontal adjustment for Positioning the manifold	150 mm
